## PRODUCT RELEASE NOTES

# IDEAM™ Server 5.01

IDEAM Server 5.01 enables the easy integration of bar code data collection, mobile computing applications, and bar code label printing into enterprise wide applications.

## New Features

- Ability to make a backup of the server configuration
- Multi server management by a single instance of the managing software (IDEAM Server Console or Monitor)

## Existing features of IDEAM Server 5.00

- New IDEAM Server in full TCP/IP mode, allowing a complete cross-connection between the clients

## New Supported Clients

The major competitors of the market can communicate with IDEAM Server. A protocol SDK is provided on demand with IDEAM Server to easily implement the communication layer with another application not generated with IDEAM Mobile.

# IDEAM™ Server 5.01 Installation and Usage Information

## Prerequisites

- Microsoft Installer 3.0
- Framework .NET 2.0
- For Windows 2000, last version of the MDAC component
- The user must have administrative rights to install the product

## Installation

Before installation of IDEAM Server 5.01, it is strongly recommended that you:

1. Stop the Monitor.
2. Uninstall previous version of IDEAM Server (manually clean up residual directory if necessary).

## Use Restrictions

The dongle key type must be USB.
